

Mission Statement

The mission of the Clinical Forensic Psychology Ph.D. program at John Jay College of Criminal Justice and the Graduate Center is to train ethical scientist-practitioners of clinical psychology. The program prepares students to become scholars, experts and leaders in the academy, institutions, and clinical settings. The program also provides students with the education and training to provide professional psychological services to and within law enforcement and the criminal and civil justice systems. Thus, students are prepared to contribute to both the practice and science of clinical and forensic psychology by providing empirically-validated treatments, assessment and consultative services and through their research endeavors.
